## Scope of Work Cherokee County Site - Galena Subsite Topographic Maps

- Topographic maps are needed for the areas marked on the attached map (Baxter Springs, Kansas quadrangle map and portions of Joplin West, Missouri; Crestline, Kansas; and Webb City, Missouri quadrangle maps). The topographic maps will be used to design the removal and regrading of the mine waste pile areas.
- The topographic maps should include the mine waste areas in the designated areas marked on the attached map. The boundaries of the topographic map should be the tree lines, where present, bounding the waste areas. Where there are no tree lines, the maps should include the waste areas and the area approximately 100 feet outside the waste areas. Where a stream ends at a boundary of a designated area on the attached map, the stream should be mapped for 500 feet downstream or upstream of the marked boundary.
- The topographic maps should be one inch = 100 feet, with two-foot contour intervals.
